

## SOUTH OKANAGAN **WATERWORKS**

### **Company Overview:**

Our company provides you with fully certified operators including our chief water operator Mike Snair with over 15 years experience running water distribution systems of many sizes. With experience in operations and management of these systems and a background in plumbing for over 30 years. Our chief operator is fully certified in **Water Distribution level 2, Water treatment level 2, Fire Hydrant Maintenance Technician, Back flow assembly tester, Chlorine Handling, Maintenance Management Program Development, Hazard Identification and Risk Assessment, Work Site Safety Inspection, Advanced Control/Shut off valves/Flow metering/leakage, Confined Space Entry, Asbestos Awareness for Municipal Workers**

Our company has helped many small systems with upgrades as well as budgeting and management struggles. We strive to keep small systems independent by assisting in the day to day and managing the operations side. With experience in yearly budgets, future infrastructure planning and maintaining of aging systems we can help small systems stay on track and manage future expenses.

The overall experience level of our team in all scenario's emergency and nonemergency gives us a wide range of contacts and knowledge throughout the Okanagan Valley.

With South Okanagan Waterworks you'll get a peace of mind knowing that providing the community with quality drinking water is our number one priority and that we take pride in managing and maintaining systems of all sizes and budgets.

If you have any questions please don't hesitate to reach out,
